

Cristal glass enclosure (different heights)

- **General design:** Stainless steel on the outside and inside, all visible sides polished; height-adjustable, inclining intermediate shelves made of tempered safety glass. Optically matches the range of display cases.
- **Closed design:** Customer side panoramic window made of tempered safety glass; LED lighting, wiring leads out downward – without light switch; operator side sliding doors made of insulating glass.
- **Design with soft-close removal flaps:** Customer side soft-close flaps made of acrylic glass; LED lighting; wiring leads out downward – without light switch; operator side sliding doors made of insulating glass.
- **Open design:** LED lighting; customer side and operator side open; wiring leads out downward – without light switch.
